I enjoy creating, managing, and developing software and web applications. I feel most comfortable leading small to midsized team environments where group thinking and friendly competition is encouraged.

↔ Experience

DiscoverTec: 2016 – Present Jacksonville, FL

Senior Developer leading many different projects and teams which DiscoverTec supports. Externally, my focus is customer facing to develop web and mobile solutions for a wide range of clients. Internally, I contribute to many of the agile development processes speaking and mentoring to the development community.

Technologies: .NET core, VueJS, Web API, K8S, TFS, Kentico, Umbraco, MSSQL

Ortho Clinical Diagnostics: 2012 – 2016 Rochester, NY – Infoscitex a DCS company

Contracting position working with Ortho Clinical Diagnostics (OCD) as a software engineer in support of the e-Connectivity interactive management system. This includes developing the software architecture to securely transfer, extract, load, and present patient information from OCD blood analyzers onto a variety of visual media.

Technologies: C#, Web Forms, WCF, MSSQL, SSIS, SSMS, AngularJS, jQuery, D3

Air Force C2IC Vocabulary OneSource: 2008 – 2012 Hampton, VA - DRC / Goldbelt Hawk LCC

Air Force contracting position tasked to develop “OneSource” a data analysis and exploration tool used by the Air Force C2IC Vocabulary Team and participating communities of interest. This included an ongoing two year process to redesign the workflow, graphical interface, and develop a fast and secure method for retrieving data using Oracle and .NET web services.

Technologies: C#, Web Forms, MVC, jQuery, Oracle, XML, XSD, XSLT, PL/SQL
